

END-USER REBATE

Spray Away Tough Cleaning Problems

CloroxPro® Sprays End-User Rebate

PROMOTION PERIOD: July 1 – December 31, 2023

Not All Cleaners Are Created Equal

When it comes to the challenging tasks professional cleaners face—like cutting grease, removing mold & mildew, dealing with tough stains and messes on surfaces — regular all-purpose cleaners won't cut it. These tasks require cleaning products formulated to effectively tackle these issues.

If not cleaned properly, these soils and stains can negatively impact how occupants and visitors view a facility. Over time they can also lead to building damage and costly repairs.

Why It Matters

Grease/Grime — Grease and grime can quickly build up on surfaces, clog drains and leave residue behind that can harbor bacteria and odors.

Mold & Mildew — Mold and mildew can lead to health concerns for building occupants and, if left untreated, may damage the building itself. Inhaling or touching mold can cause allergic reactions or trigger asthma episodes in people with asthma¹.

Hard Water Deposits and Stains — More than 85% of the U.S. has hard water.² Hard water in a facility can lead to calcium and limescale build up - affecting the performance of faucets, shower heads, pipes - as well as leaving rust and other stains behind that can affect the perception of clean^{3,4}.

Soap Scum — Soap scum is not only unsightly but can be a breeding ground for mold & mildew.

Let CloroxPro Sprays Do The Work!

To help maintain a healthy facility, use products in your cleaning routine that are specifically formulated to tackle these soils quickly and easily, so you can do more while you clean. **Prevention is the best protection.**

**Dissolves Grease, Grime,
